

SPLIT RAIL FENCE

LOCUST 3-RAIL, SPLIT RAIL

Used for centuries and still today for livestock, horses, and as decorative and practical yard fencing, split rail remains a popular choice for homes. To define a large property, split rail in wood or vinyl is an ideal choice. This simple but elegant style is popular for farms, parks, businesses, and homes on large acre lots. Split rail fencing is affordable, durable, and beautiful. By adding wire weld fence to the outside line, split rail will also meet pool enclosure regulations.
