

# WOOD PRIVACY & SEMI-PRIVACY

Wood blends fence and railing lines into green areas and complements landscaped backyards. Designs include the market standard, good-neighbor tongue & groove, cap & trim, privacy cedar fence in several topper options, and a variety of vertical and horizontal picket configurations. Models can be full privacy or slightly spaced at 1" or 2" in a semi-privacy option. Post caps, add-ons and color and stain options make wood the most customizable of all fence materials.
